

S k i n e a

— Cosmetics for Wearing on the Skin —

A new value set not just for clothing, but for cosmetics.

By producing products by Amiaz, which holds a cosmetics
manufacturing and sales license,
You can sell clothing that has undergone skincare treatment as [cosmetics].

Patent Application Number: Japanese Patent Application 2025-210139

SKINEA PREMIUM

"A luxurious reward for your skin"

Skinea

'Cosmetics that gently support your concerns'

— The value of skincare in everyday clothes —

SKINEA LFS

[Gently wrapping your skin as
an extension of daily life]

SKINEA MED

'Cosmetics that gently support your concerns'

A woman with dark hair is shown from the chest down, wearing a white button-down shirt and a white skirt. The image is faded and serves as a background for the text.

S k i n e a

— The value of skincare in everyday clothes —

Skincare ingredients that meet cosmetic standards are processed into clothing.

Because it's an item that comes into direct contact with the skin,

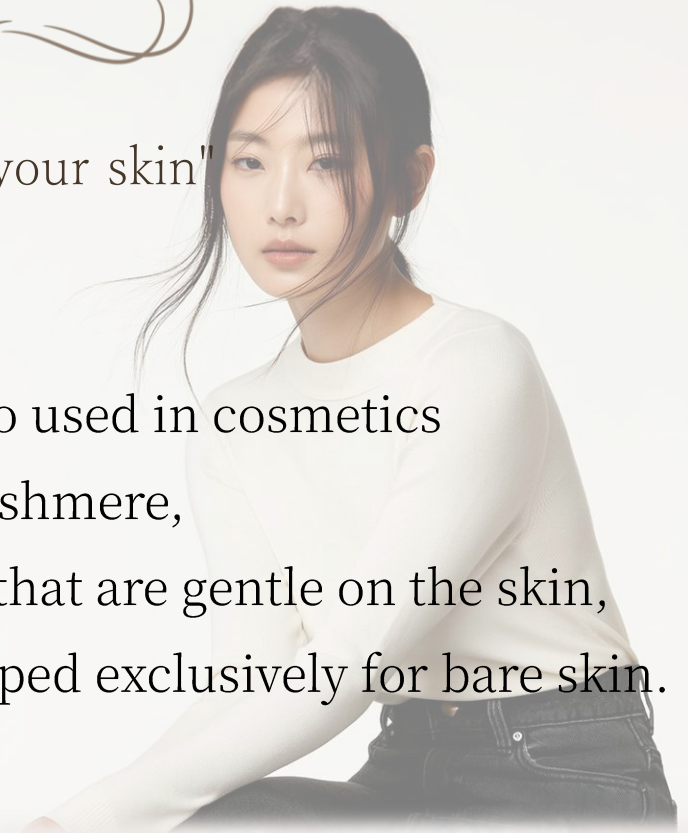

Maintains skin condition with daily wear.

"A luxurious reward for your skin"

Rare collagen-derived fibers also used in cosmetics
as well as silk and cashmere,

Combined with high-quality materials that are gentle on the skin,
A high-performance premium line developed exclusively for bare skin.

SKINEALS

[Gently wrapping your skin as an extension of daily life]

Whether you're sleeping or the casual moments of the day,
Just by "wearing, wrapping, and touching," you can start skincare,
A new lifestyle care series.

Night cap, eye mask, pillow and bed cover,
Arm covers, gloves, leg warmers--.

All items undergo skincare treatment,
"Just wrapping it works like a cosmetic."

Whether it's sleeping time, housework, or relaxing,
Everything is about beauty time to refine your skin.

SKINEA MED

'Cosmetics that gently support your concerns'

As the population ages, issues such as "pain," "stiffness," and "difficulty moving"

Everyone's small daily worries come to everyone.

It was created to support those everyday concerns.

Penetrates the joint care ingredient proteoglycan into fibers,

Installed on supporters, arm covers, leg covers, and more.

Simply wearing it gently supports your joints and moisturizes your skin.

Wearable cosmetics that deliver care ingredients.

It's not medicine, but you can definitely feel the ease of being 'comfortable.'

We propose such a new kind of medical skincare.

Processing Details

Mainly three ingredients: sugar squalane (sugarcane raw material), silk protein, and undecylene acid monoglyceride. (Antibacterial agents) as the base, and processing is performed to suit each characteristic.

Names are based on Japanese law.

Structure of Skineea vesicle structure

Freeze the emulsion and observe the cross-section under an electron microscope.

electron microscope photo
300 nm

- It is divided into oil and water layers
- The oil layer is squalane, the same component found in human sebum.
- When it comes into contact with human oil, the oil layer dissolves and the water layer inside penetrates the skin.
- Various chemicals can be placed in the water layer

By applying the cosmetic solution that comes on clothing directly to the skin,
Achieve the same effect as applying a cosmetic solution directly to the skin

Features of Skinea

Unlike typical microcapsule processing methods for clothing, Skinea can actually be expected to have beauty benefits for the skin.

Skinea

Extremely small with diameters of
300-600 nm (nanometers)

sucking up method
Easy to process into fabric

Do not use binders
Finishes with a soft texture

Dermally absorbable
Ingredients penetrate through the skin

Ingredients
Size

Processing
methods

Fabric
texture

to the skin
Effects

microcapsule

With diameters of several micrometers ~
several thousand micrometers (microns),
Many are micro-containers and spherical

The capsule wall surrounding the core material
(the part inside the microcapsule) contains a
large amount of polymer, so many cannot be
used by the desorption method

Because binders are used to adhere to the
fabric, the texture often becomes harder

sticking to the fabric
Does not penetrate the skin

In-store Deployment Image

Cosmetics Brands × Skineea

By combining the realms of "clothing that comes into direct contact with the skin" and "cosmetics that act on the skin,"

We can offer a new skin wellness experience.

You can enhance brand value and establish a differentiated product line.

SKINEA LFS

SKINEA MED

**Established a cosmetics manufacturing and
sales system with in Japan**

Made in Japan × Global Expansion

We have obtained the 'Cosmetics Manufacturing and Sales Business
License' in Japan.

As a result, SKINEA products will be recognized as cosmetics in Japan.
We establish manufacturing and sales systems to achieve further
quality control and enhance brand value.

**「Made in Japan Quality」
Bringing Japanese Quality to the World**

Manufactured and quality controlled within Japan,
High safety standards, thorough quality control, stable production
system, and highly reliable product supply
This is how it is realized.

Enabling overseas export

Official expansion into overseas markets, expansion of transactions with
partners in various countries, and growth as a global brand.

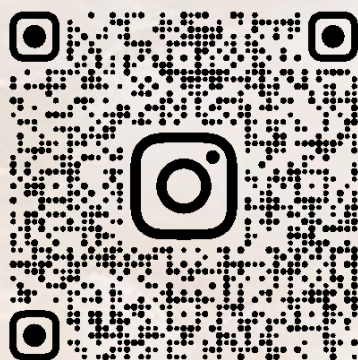

cosmetics

Amiaz Co., Ltd. holds a "Cosmetics Manufacturing and Sales License," which allows clothing to be treated as cosmetics, enabling us to reliably market products that are gentle on the skin and have beauty benefits.

Normally, even if clothing has the same effects as cosmetics, it cannot be sold as cosmetics without permission. However, with a permit, clothing can be sold as cosmetics by listing the 56 items (such as skin conditioning and adding radiance) defined by the Ministry of Health, Labour and Welfare as the scope of efficacy for the human body under Japan's Pharmaceutical and Medical Device Law (formerly the Pharmaceutical Affairs Act).

Cosmetic certification follows Japanese laws and standards in sequence.
